Summary

Full-stack developer with internship experience and three deployed products in stock analytics, personal finance, and game discovery. Experienced in end-to-end development with Next.js, Node.js, Python, PostgreSQL, and MongoDB, including APIs, automation, security, and responsive interfaces.

Experience

Smallcap.ai Jun 2024 – Aug 2024
Full-Stack Web Development Intern *Dubai, UAE (Remote)*

- Created a multi-module React admin dashboard for analytics and operations, using Chart.js, reusable components, searchable tables, filters, and pagination.
- Developed Node.js/Express API endpoints and MongoDB Atlas schemas with form validation and AWS Lambda integration for create, update, and delete workflows.
- Integrated independently developed modules into the main application, resolving CSS conflicts, overlay and hover bugs, and mobile layout issues across multiple pages.

Projects

StockPredict AI | Next.js, Express, FastAPI, MongoDB, LightGBM stockpredict.dev

- Developed and deployed a stock research platform for 75 companies from the S&P 100, featuring live market data, interactive charts, watchlists, machine-learning forecasts, and SHAP-based explanations.
- Automated a weekday GitHub Actions pipeline that processes 10+ sources for sentiment analysis, feature engineering, model training, and 225 forecasts across next-day, 7-day, and 30-day horizons.
- Built the Node.js/Express API layer for persistent watchlists and live price updates, with JWT sessions, MongoDB, rate limiting, health checks, and Jest/Supertest tests.

ExpenseVision | Next.js, Supabase, PostgreSQL, Upstash Redis expensevision.tech

- Built and deployed an installable personal finance PWA with authentication, spending dashboards, budgets, receipt storage, CSV import, offline entry, push notifications, and weekly summaries.
- Developed receipt scanning across camera, file upload, and mobile sharing, with client-side image compression and OCR-based extraction of merchant, amount, date, and category.
- Secured financial data with Supabase row-level security, private storage, expiring links, file-content validation, and API rate limits. Added duplicate-request protection, 76 Vitest tests, and a Playwright end-to-end flow.

Verdict Games | Next.js, Supabase/PostgreSQL, React Query verdict.games

- Built and deployed a game discovery platform with 8,200+ games from seven data sources, advanced search, comparisons, deals, release calendars, curated lists, and detailed game pages.
- Automated a 13-stage ingestion and enrichment pipeline with duplicate detection, multi-source scoring, mobile-store verification, scheduled refreshes, and SEO metadata generation.
- Implemented community reviews, voting, comments, follows, personal libraries, and an admin dashboard with moderation tools and audit logs.

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL
Frontend: React, Next.js, Tailwind CSS, HTML/CSS, responsive design, PWAs, data visualization
Backend & APIs: Node.js, Express, FastAPI, REST APIs, WebSockets, JWT, OAuth
Databases & Cloud: PostgreSQL, Supabase, MongoDB, Redis/Upstash, AWS Lambda, Vercel, Render
AI/ML: LightGBM, LSTM, SHAP, OCR pipelines, LLM APIs (Groq, Gemini, OpenRouter)
Testing & DevOps: Vitest, Playwright, Jest, Supertest, Git, GitHub Actions, CI/CD

Education

Manipal Academy of Higher Education, Dubai Sep 2021 – Nov 2025
B.Tech. in Computer Science and Engineering *Dubai, UAE*
