EDUCATION

B.Tech. in Computer Science and Engineering Sep 2021 - Nov 2025
Manipal Academy of Higher Education Dubai, UAE

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS
Frontend & CMS: React, Next.js, Tailwind CSS, WordPress, Elementor
Backend & APIs: Node.js, Express, FastAPI, REST APIs
Databases & Platforms: PostgreSQL, MongoDB, Redis, Supabase
Tools & Testing: Git, GitHub Actions (CI/CD), Vercel, Vitest, Playwright

EXPERIENCE

Web Development Intern Aug 2026 - Nov 2026
TechMagic Technologies *Sharjah, UAE (Remote)*

- Built and updated responsive WordPress and Elementor business pages with product listings, contact forms and navigation; configured themes and plugins to match client requirements.
- Implemented technical SEO updates across HTML headings, metadata, structured data and sitemaps; used Semrush and Search Console to identify broken links and indexing issues.
- Deployed website updates through cPanel, configured redirects and maintained backups; optimized images and caching based on PageSpeed Insights reports.

Full-Stack Web Development Intern Jun 2024 - Aug 2024
Smallcap.ai *Dubai, UAE (Remote)*

- Developed a React admin dashboard with interactive charts, searchable tables, filters and pagination for analytics, user management and task operations.
- Connected user dashboards to backend APIs for profiles, activity history and personalized recommendations, bringing account information into one interface.
- Integrated independently developed modules and resolved CSS conflicts, overlay and hover bugs, and mobile layout regressions across application pages.

PROJECTS

StockPredict AI | *Next.js, Express, Python, MongoDB* stockpredict.dev

- Built and deployed a stock analytics platform for 75 US companies, combining live prices, interactive charts, watchlists and AI-generated analysis of price forecasts.
- Automated market-data collection, model training and forecast updates with Python and GitHub Actions; connected the prediction pipeline to the web app through MongoDB.
- Secured Express APIs with token-based sessions and request limits; added automated checks for outdated forecasts and failed data collection.

ExpenseVision | *Next.js, Supabase, PostgreSQL, Redis* expensevision.tech

- Built an installable expense-tracking app with spending dashboards, budgets and CSV import; enabled offline entries to sync automatically without creating duplicate records.
- Developed AI receipt scanning for camera uploads and mobile sharing, using three OCR providers with fallback handling to extract merchant, amount, date and category.
- Protected financial data with Supabase row-level access rules, private receipt storage and input validation; added 83 Vitest tests and a Playwright end-to-end test.
